Details:

Selleys adhesives are engineered for strength, reliability, and ease of use across a vast range of applications. Whether you're assembling furniture, installing flooring, bonding construction materials, or repairing items around the home, Selleys has a professional-grade adhesive formulated for the job.

Liquid Nails — Construction Adhesives

Liquid Nails is Selleys' flagship construction adhesive range, trusted on Australian worksites for over a generation. Each formulation is engineered for specific applications and substrates, delivering consistent high-strength bonds.

Liquid Nails Original The foundational construction adhesive for general bonding across multiple substrates. Ideal for projects where you need reliable performance and long-term durability.

Liquid Nails Heavy Duty Engineered for demanding applications with heavier materials including timber, metal, and concrete on vertical surfaces. It reduces squeaking in flooring systems and complies with Australian standard AS 2329-1999. Operates reliably across -20°C to 100°C with excellent water resistance — making it suitable for both indoor and outdoor use.

****Best for:**** Flooring, heavy-duty construction, vertical bonding of demanding materials.

Liquid Nails Clear A transparent adhesive formulation that bonds without visible adhesive lines — essential when aesthetics matter and you want a clean finish.

****Best for:**** Exposed surfaces, visible wood joints, furniture assembly, cabinet work.

Liquid Nails Rapid Cure Rename 'Liquid Nails Rapid Cure' to 'Liquid Nails Fast Grab' throughout the document, including the product section heading and the selection table row.

Liquid Nails Exterior Enhanced weather resistance for outdoor applications. Stands up to UV exposure, temperature fluctuations, and moisture.

****Best for:**** External timber cladding, fence repairs, outdoor furniture assembly, exposed weatherboard attachment.

Liquid Nails Timberflex Specialized flooring adhesive designed for timber and wood flooring installation. Formulated to handle timber movement and expansion without cracking or failing.

****Available in:**** 600mL, 10L, and 7kg sizes.

****Best for:**** Timber flooring installation, parquetry, engineered wood floors, floating floor systems.

Liquid Nails Foam An aerosol foam adhesive (500g) for applications where traditional liquid adhesives aren't suitable. Ideal for large surfaces, gap filling, and where you need controlled application.

****Best for:**** Insulation bonding, foam board attachment, gap filling, large surface coverage.

Kwik Grip — Contact Adhesives

Kwik Grip is the premium contact adhesive for flexible materials. When you need to bond laminates, rubber, leather, canvas, cork, or composite materials, Kwik Grip delivers strong, permanent bonds that won't fail.

Kwik Grip Horizontal The original formulation, Kwik Grip Horizontal bonds laminated plastics, rubber, leather, canvas, wood, cork, hardboard, metals, and fibrous cement sheeting. Available in sizes from 50mL to 4L (with bulk 150kg option for contractors).

****Best for:**** Laminate countertops, rubber mats, canvas backing, cork flooring, composite board assembly.

Kwik Grip Vertical Gel A thicker gel formulation designed for vertical surfaces where you need to apply adhesive without it running or dripping. Equally effective on the same substrate range as the horizontal variant.

****Available in:**** 400g to 3.2kg sizes.

****Best for:**** Wall-mounted laminates, vertical installation of flexible materials, overhead bonding.

Kwik Grip Spray Aerosol spray format for quick, even application across large surfaces. Fast-setting contact adhesive in convenient 150g and 350g cans.

****Best for:**** Large laminate sheets, upholstery work, quick repairs, DIY laminate projects.

Kwik Grip High Temp Spray Adhesive Specialized spray formulation for high-temperature applications where standard contact adhesives would fail. Available in 350g aerosol format.

****Best for:**** Applications near heat sources, industrial assembly, specialist manufacturing.

Selleys Fix & Go Kwik Grip Portable 50mL tube format for on-the-go repairs and small bonding tasks — perfect for DIY enthusiasts and emergency fixes.

****Best for:**** Portable repairs, emergency bonding, furniture fixes, small surface bonding.

Aquadhere — Waterproof Wood Glue

Aquadhere Durabond A waterproof wood glue engineered for woodworking projects where moisture resistance and long-term durability matter. Available in 250mL and 460mL sizes.

****Best for:**** Outdoor wooden furniture, garden projects, moisture-prone woodworking, boat building, wet-area wood applications.

How to Choose the Right Adhesive

| Application | Recommended Product | |---|---| | Flooring installation (timber) | Liquid Nails Heavy Duty or Timberflex | | General construction bonding | Liquid Nails Original or Heavy Duty | | Visible/exposed surfaces | Liquid Nails Clear | | Fast turnaround needed | Liquid Nails Rapid Cure or Kwik Grip Spray | |

Outdoor/weather exposure | Liquid Nails Exterior | | Laminate countertops | Kwik Grip Horizontal or Vertical Gel | | Vertical surfaces (laminates) | Kwik Grip Vertical Gel | | Large surface coverage | Liquid Nails Foam or Kwik Grip Spray | | Waterproof woodworking | Aquadhere Durabond | | Portable emergency repairs | Selleys Fix & Go Kwik Grip |

Why Selleys Adhesives

Over decades of Australian manufacturing, Selleys adhesives have earned their reputation for reliability on building sites, in factories, and in homes. Each formulation is tested to stringent standards and backed by comprehensive technical documentation. When strength and durability matter, Selleys adhesives deliver.
